

Privacy Policy

Use of Cookies

UDG München is dedicated to generate value for our customers. To measure the effectiveness of our work, we are using a technology based on cookies. These cookies are mainly served by our adservers but also technology of partners is used. Cookies are small text files that are saved in a browser.

We use cookies to save information on what kind of ads on which websites were clicked. Based on this information we are able to attribute our partners a commission for providing us with the ad space on their websites. If you click an advertising link for one of our clients on one of our partner websites and later buy something at the online store of our client, we can pay the website a commission based on the information in the cookie. In this process no personally identifiable information is used.

Our cookies are only valid for a limited time (typically 30-90 days) and are deleted automatically after this period. Cookies in general do not pose a security threat of any kind for your computer or your data. All data we save in our cookies is anonymous and will not be passed on to third parties.

If you do not wish to have cookies stored on your computer you can always deactivate this functionality in the settings of your browser. However, please keep in mind that some websites require cookies to work correctly. Disabling also prevents us to attribute commissions to the websites you have visited. In running an attractive and up-to-date website substantial costs need to be covered by the website owner, so income from advertising is crucial for many small and medium sized websites. By disabling cookies these website owners are denied this income.

Cookies used by UDG München

The majority of our cookies is served by a server named ***a.nonstoppartner.net*** which is our main ad-server. In certain cases cookies might also be served by servers named ***banner.nonstoppartner.net*** or ***banner.nonstoppartner.de*** which are legacy systems we plan to phase out in the future.

You can block cookies from our ad-servers by adding the domains mentioned to the list of blocked domains in the cookie settings of your browser.
